

Reliability since 1955

The history of Kuhmo Oy goes back a long way. We have produced pine and spruce products since 1955, always developing our production and taking the needs of our customers into account. We continuously ensure that our production equipment is at the cutting edge of technology, which guarantees our ability to always deliver competitive products to our customers.

We primarily obtain our raw materials from the sustainably maintained commercial forests in Kainuu. Our products are exported to more than 30 different countries annually. Our operations are based on long-term relationships with our partners throughout the value chain.

Our products are known around the world for their URSUS shipping mark – URSUS guarantees quality.
